EDUCATION

Indian Institute of Information Technology Manipur

Manipur, India

B.Tech in Computer Science and Engineering (AI & Data Science) – CPI: 8.27

2023 – 2027

Sri Chaitanya Junior College

Vijayawada, Andhra Pradesh

Intermediate (Class XII) — Percentage: 97%

Jul 2021 – Mar 2023

ACHIEVEMENTS

GATE Qualified (Graduate Aptitude Test in Engineering)

RELEVANT COURSEWORK

Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Compiler Design, Machine Learning, Artificial Intelligence, Natural Language Processing

PROJECTS

BioSecure Access System (Voice + Face Authentication) | *Flask, React, Node.js, Deep Learning* | [GitHub](#)

- Developed a multimodal authentication system combining voice and face recognition for secure access control
- Implemented speaker verification using ECAPA-TDNN (SpeechBrain) and face recognition using DeepFace with threshold-based similarity matching
- Designed a two-stage pipeline: 1-to-N voice identification followed by 1-to-1 face verification, reducing computation overhead and improving accuracy
- Built a hybrid RBAC + ABAC access control system supporting roles (admin, user, guest, blocked) with time-based and resource-level restrictions
- Engineered a full-stack architecture using React frontend, Node.js/Express backend, Flask ML server, and MongoDB for user and role management
- Optimized audio processing by converting browser-recorded WebM audio to 16kHz mono WAV using FFmpeg for model compatibility

Secure Digital Evidence Management System | *MERN Stack* | [GitHub](#) | [Live](#)

- Built a secure web platform for managing digital evidence with role-based access control
- Implemented evidence hashing to ensure data integrity and tamper detection
- Designed case management system with audit logging and live notifications for real-time updates
- Stored files securely using OS-level file system integration

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript

Web Technologies: MongoDB, Express.js, React.js, Node.js, Tailwind CSS

AI/ML: Machine Learning, Deep Learning, TensorFlow, Keras

AI Tools: ChatGPT, Claude, Prompt Engineering, AI-assisted Development

VFX & 3D: Blender (Modeling, VFX, Compositing, Animation)

Tools: Git, Postman, VS Code

Soft Skills: Problem Solving, Teamwork, Fast Learner

CERTIFICATIONS

Python Certification — Spoken Tutorial, IIT Bombay [[View Certificate](#)]

C++ Certification — Spoken Tutorial, IIT Bombay [[View Certificate](#)]

EXTRA-CURRICULAR ACTIVITIES

Cricket and Chess (participated in tournaments), Regular Gym Practice
